As at firft it may be difficult to trace out the direct road from *London* to some of the places specified in the preceding Great Roads, one instance of the method of doing it may not, perhaps, be improper. Suppose then I wanted to find the direct road from *London* to *Gairfborough*—From the Index I find that *Gairfborough* is in p. 29, and there a Market Town branching out from *Lincoln* in the road from *London* to *Grimfby*; but as of that road we have in that place only the continuation from *Peterborough* given, I look for *Peterborough* in p. 23, as directed, and find it in the road from *London* to *Boston*; but as here we have only a continuation of the road from *Stilton* to *Peterborough*, I look for *Stilton*, p. 19, and there find the preceding part of the road which I wanted; therefore reading from *London* to *Stilton*, p. 19, from *Stilton* to *Peterborough*, p. 23, from *Peterborough* to *Lincoln*, p. 28 and 29, and then from *Lincoln* to *Gairfborough*, I have the direct road required.

EXAMPLE for Illustration.

On what day of the week will the first of August 1772 happen, the Dominical letter after February being D.

To the right hand of August look for the letter D, and under it you will find the numbers 2, 9, 16, 23, 30, pointing out the days on which Sunday will fall that month; then allowing the next column of numbers to the right hand for Mondays, the next for Tuesdays, &c. the day given will be found to fall on a Saturday.

But as the above Diary entirely depends upon knowing what the Dominical letter is, we shall therefore annex a general Table whereby that may be easily found for any year of Christ, either according to the Julian or Gregorian account.

To illustrate this Table, let it be required to find the Dom. Let. for 1774, both according to the O. and N. S.

Divide 17, the number of centuries since Christ, by 7 for O. S. and 4 for N. and to the right hand of the remainders, 3 and 1, given in the two first columns, it will be found that — 72 is the last leap year, and that above this number stand the letters A G and E D with *fed* and *cba* respectively: wherefore 1774 being two years after 1772, E and B will be the letters required.

An EXAMPLE to shew the Use of this TABLE.

A Merchant in Dublin remits to his Correspondent in London 82*l.* Irish, when the Exchange was 12*l.* 10*s.* *per cent.* How much will be received in London ?

Or, In selling Goods for 82*l.* the Gain was 12 $\frac{1}{2}$ *l.* *per cent.* What was the Prime Cost ?

Or, How much South-Sea Stock for 82*l.* when it is sold at 112 $\frac{1}{2}$ *l.* *per cent.* ?

By the Table 12*l.* 10*s.* = 88889 ; then

$$\begin{array}{r} 100 + 8 L = 711 \text{ III} \\ 10 + 2 L = 17 \text{ 778} \\ 8 L = 7 \text{ III} \end{array}$$

£ 736 000 will be the Answer.
